

Callusan FRESH for Sweaty Feet and Skin that is Sensitive to Fungus

The active cream mousse with the unique **4-way action**. It regulates the perspiration **(1)**, prevents odours **(2)** and protects skin that is sensitive to fungus **(3)**. In addition substances such as e.g. glycerine and jojoba oil protect fatigued skin **(4)**. The wonderfully fresh lime scent gives a true feeling of wellness.

Regular foot care can help to prevent athlete's foot!

Use Callusan VINUM for Tired Feet and Heavy Legs

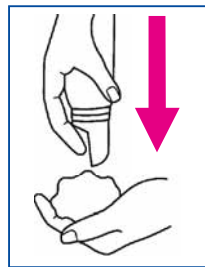

The fresh care with precious red vine leaf and horse chestnut extracts. Especially soothing thanks to the cooling menthol. Moisturising due to glycerine and urea. Lasting care with shea butter, jojoba oil and vitamins.

Excellent compatibility with surgical stockings and pressure bandages.

The Most Important Advantages of Callusan:

- Absorbs quickly and fully
- No greasy film after application
- No blocking of the pores of the skin
- Neutral and pleasant scent
- High yield and favourably priced
- Dermatologically tested
- Textiles and stockings can be put on immediately

Important instructions for application: shake can properly and hold down vertically.

Callusan CREAM MOUSSE

CREAM MOUSSE

Callusan Cream Mousses: the Next Generation of Foot Care

Callusan Cream Mousses are a modern and innovative range of skin care products.

In contrast to conventional ointments or creams, Callusan no longer contains a greasy ointment base thanks to the special aerosol technology.

This fine, light and airy cream mousse is quickly absorbed and doesn't leave behind an unpleasant greasy film. The pores of the skin are not blocked and the skin is able to "breathe" freely.

Callusan is available in six different variations, depending on the type of skin.

The Fitting Solution for Dry Skin on Feet:

Dry skin needs moisture. Callusan provides beneficial moisturising with urea in different concentrations. Use Callusan

- **HYDRO** with 5% urea for dry skin
- **EXTRA** with 10% urea for very dry skin
- **FORTE** provides intensive care for calluses and cracks

The skin care treatment is rounded off with avocado oil, glycerine and shea butter. Stearic acid protects the skin from environmental exposure and ensures balanced rehydration. It goes without saying that Callusan HYDRO, EXTRA and FORTE are free of dyes and fragrances.

Use Callusan **HYDRO** + **EXTRA** for Dry and Very Dry Skin

Use one of the following depending on the level of dryness of your skin:

- Callusan HYDRO with 5% urea for dry skin
- Callusan EXTRA with 10% urea for very dry skin
- Callusan HYDRO and EXTRA are highly suitable as a daily skin care treatment for diabetics

After regular use of
Callusan EXTRA

Callusan **FORTE** Provides Intensive Care for Calluses and Cracks

The high dose of urea makes even tough calluses feel much softer. Callusan FORTE gives the skin back its elasticity and suppleness. Very soon hard and tough calluses once again feel soft and well looked after.

Provides amazingly
successful foot care
treatment!

Callusan FORTE

Callusan Foot Care Information:

The skin on the feet and legs places special demands on foot care products. On the one hand this is due to the special nature of the skin in these areas of the body. On the other hand the highly physical load and the wearing of footwear often lead to a deficit in foot care.

The Callusan Cream Mousses were especially developed to meet these demands and to give your skin exactly what it needs!

Use Callusan **VITAL** for Sensitive Skin and All-round Body Care

The all-round care for sensitive and fatigued skin on the feet and the body. Vital **jojoba oil** and precious **shea butter** create a soft and velvety feeling of the skin.

Vitamins A and **E** protect the skin and make it more resistant. This discreet fragrant mousse provides a softer and smoother feeling skin and thus a feeling of well-being. Ideal for the skin care treatment of aged skin.
