FOOTCREAM

NEW!

Callusan: Footcream in an innovative dispenser

Callusan proudly presents its third caring series: The new **foot creams** combine approved cream formulas with a modern dispenser can; thus allowing you to enjoy the simple and comfortable application, as with all Callusan products. Three different variants offer the appropriate care for individual foot problems. Indulge yourself today with the new **Callusan foot creams!**

Due to the convenient dispensing system Callusan foot creams are particularly pleasant to use. The rich texture is used sparingly and can be applied neatly. The dispenser cans function without propellant, enabling a simple and complete depletion. The self sealing dispenser offers best content protection against external contamination.

All Callusan foot creams are based on high quality oil-in-water emulsions, which have been developed in close cooperation with chiropodists and podiatrists. Contrary to most conventional creams, Callusan foot creams do not contain mineral oil (paraffinum liquidum). All variants have been dermatologically tested.

Callusan
FOOTCREAM

For dry skin
with 10% urea

Callusan Footcream UREA EXTRA:

Ideally suited for the extensive care of dry and physically strained skin on feet and legs. 10 % urea increases the water binding capacity of the skin and counteracts any moisture deficiency.

Natural lipids soften and restore elasticity of the skin. Milk protein and aloe vera complement the care concept. Non-scented formula without perfume. **Particularly suitable for diabetic foot care.**

For calluses and
cracked skin

Callusan Footcream REPAIR FORTE:

Ideally suited for the intensive care of calluses and cracked skin. Procures astonishing results when used regularly. Highly concentrated urea and aloe vera spend moisture, thus restoring tangible softness to even the most persisting calluses.

Glycerine and precious lipids retain lasting elasticity of the skin. Natural oils provide a pleasant skin sensation.

For perspiring
feet

Callusan Footcream LEMON FRESH:

The fresh care experience featuring 3 benefits against moist and perspiring feet:

- Alaun provides gentle regulation of sweat secretion
- Pleasant deodorant properties due to herbal Farnesol
- Effective skin caring qualities due to aloe vera and jojoba-oil

Glycerine, lemon grass and vitamin E are complementing to the caring effect. The pleasantly lemon scented formula promotes immediate well-being.
